

SOLVO

Transform problems into opportunities

Problems in business are inevitable. All companies encounter challenges and setbacks, but one of the key factors that separates the weak from the strong is the way that they respond to problems.

Leaders who are destined for success recognise that problems are an opportunity to improve teamwork skills, cultivate creativity, and instil positive and constructive attitudes across the company.

There are many benefits in adopting a methodical and professional approach to problem solving:

- It will help prevent the problems from reoccurring.
- The impact of problems will be minimised through effective team collaboration. This is because the best solution, not just the first one to come to mind, will be the one that is implemented.
- A problem can reveal existing issues that are undermining the progress of a team or of the business, and this can be a great learning opportunity for everyone.
- Collaborative problem solving can help a team discover new opportunities.
- Adopting a collective approach to problem solving strengthens the team instead of isolating individuals.
- By creating an environment in which problems are considered as opportunities to learn, rather than to blame, you can minimise fear, guilt and shame amongst your employees. Such an environment will help to release creativity.

SOLVO — A problem solving tool

that helps you transform problems into opportunities

Solve problems

Open collaboration

Look back and learn

Value adding

Opportunity creator

SOLVO Package Solutions

Easy

n' Go

SOLVO Easy n' Go package is best suited for companies that are familiar with the problem-solving system methodology. You might already have a problem-solving system in place but you are willing to improve and find a more structured and efficient problem-solving approach. It's clear, simple and ready to use. No consulting services needed.

Basic

n' Go

SOLVO Basic n' Go package is best suited for companies that are not familiar with the general problem-solving process and techniques. One of our consultant will facilitate the learning of the problem-solving tool. In this one-day workshop, you will identify major problems and learn how you can transform problems into opportunities.

Pro

n' Go

SOLVO Pro n' Go package is best suited for organisations that are looking to build a problem-solving culture that lasts. You are undertaking a profound cultural change and you want to develop a system that unlocks your organisation's problem solving's capacity. In this two-day workshop followed by mentoring sessions, you will learn how to detect and respond to complex problems in a consistent manner.
